About

Cambodia's coffee industry, primarily focused on Robusta due to lower elevations, faces challenges with Arabica cultivation except for hybrids. Mondulkiri Province, known for its mountainous terrain and rich soil, hosts the Bunong people who have adapted to newer crops like coffee alongside traditional rice cultivation. Mondulkiri Coffee, renowned for its quality, thrives in the province's cooler climate and is irrigated by mountain streams. Coffee MK Mondulkiri Co., Ltd, established in 2008, is a private company with its factory and farm. It processes its coffee using in-house equipment and has gained national and international acclaim, receiving full registration with the Ministry of Commerce in 2011.

EIGHT O'CLOCK

COFFEE

Throughout the years, we've explored new varieties. Changed our look.

Rolled out ground coffee and single-serving Keurig® K-Cup® packs. But there are some things we'll never change. For starters, the classic flavors inside our new bags remain untouched. All of our whole bean and ground varieties continue to be crafted using only high quality, 100% Arabica coffee. And all of our roasting is done at our own facility under the expert supervision of master roasters. It's what you look for in your coffee, and it's what we'll always deliver.

About

UESHIMA

COFFEE COMPANY

• KOBE 1933 •

The Ueshima Coffee Company story began in 1933 when an ambitious young man established a western food store in Kobe, Japan. Tadao Ueshima's passion for all things Western soon led him to discover coffee, and such was his passion for this rich, aromatic 'mysterious beverage' that he dedicated his life to making coffee popular across Japan; leading him to be known as the 'Father of Coffee' in his homeland. We have been inspired by Tadao and his principles ever since. For us, coffee is much more than just a drink. It is the pursuit of perfection.
