PROFESSIONAL SUMMARY

Software Engineering graduate from Limkokwing University of Creative Technology (GPA 4.0/4.0) with hands-on experience building mobile applications (Flutter, React Native), REST APIs (Node.js, Express.js) and payment integrations (Stripe, Bakong KHQR). Skilled in ASP.NET Web API and databases including SQL Server, PostgreSQL and Supabase. Completed an internship at the Ministry of Post and Telecommunications covering requirements analysis, application development, testing and technical documentation. Strong interest in backend engineering, enterprise systems and financial technology.

TECHNICAL SKILLS

- **Programming:** Dart, Java, C#, JavaScript, Python, Data Structures and Algorithms
- **Mobile:** Flutter, React Native
- **Frontend:** HTML, CSS, Tailwind CSS, Bootstrap, React.js, Vite
- **Backend:** Node.js, Express.js, ASP.NET, Web API, REST API development, Prisma ORM
- **Databases:** SQL, SQL Server, PostgreSQL, Supabase, MongoDB
- **Payments & Auth:** Stripe, Bakong KHQR, Clerk
- **Tools & Practices:** Git, GitHub, UX/UI Design, Testing and Debugging, Technical Documentation

WORK EXPERIENCE

HRMIS Mobile Application Intern Jun 2026 – Sep 2026
Ministry of Post and Telecommunications, Phnom Penh

- Developed responsive Flutter interfaces and integrated REST APIs to connect the mobile application with backend services.
- Implemented attendance tracking and leave request workflows for ministry staff.
- Contributed to requirements analysis, application testing, debugging and technical documentation as part of a development team.

PROJECTS

Resumate – Career-Readiness Platform 2026
Tech stack: React, Vite, Supabase, Stripe, Bakong KHQR, Python

- Built a web platform for Cambodian job seekers to create resumes, analyse job ads, match skills and prepare for interviews.
- Integrated Stripe and Bakong KHQR (Cambodia's national QR payment system) to handle online payments.

PhsarOne – Mobile Marketplace App 2026
Tech stack: React Native, Supabase, PostgreSQL, Stripe, Clerk

- Developed a mobile marketplace for buying, selling and trading items, with real-time chat and smart search.
- Implemented user authentication with Clerk and in-app payments with Stripe on a Supabase and PostgreSQL backend.

SabayBook – Movie Booking App 2026
Tech stack: Flutter, Node.js, Express.js, Prisma, PostgreSQL

- Built a movie booking app with a Flutter front end and a Node.js/Express.js REST API using Prisma ORM and PostgreSQL.

EDUCATION

Software Engineering with Multimedia 2023 – 2026
Limkokwing University of Creative Technology
GPA: 4.0 / 4.0
